

INSIDE THE CONTROL ENGINE

LIBRARY OF COMPONENTS

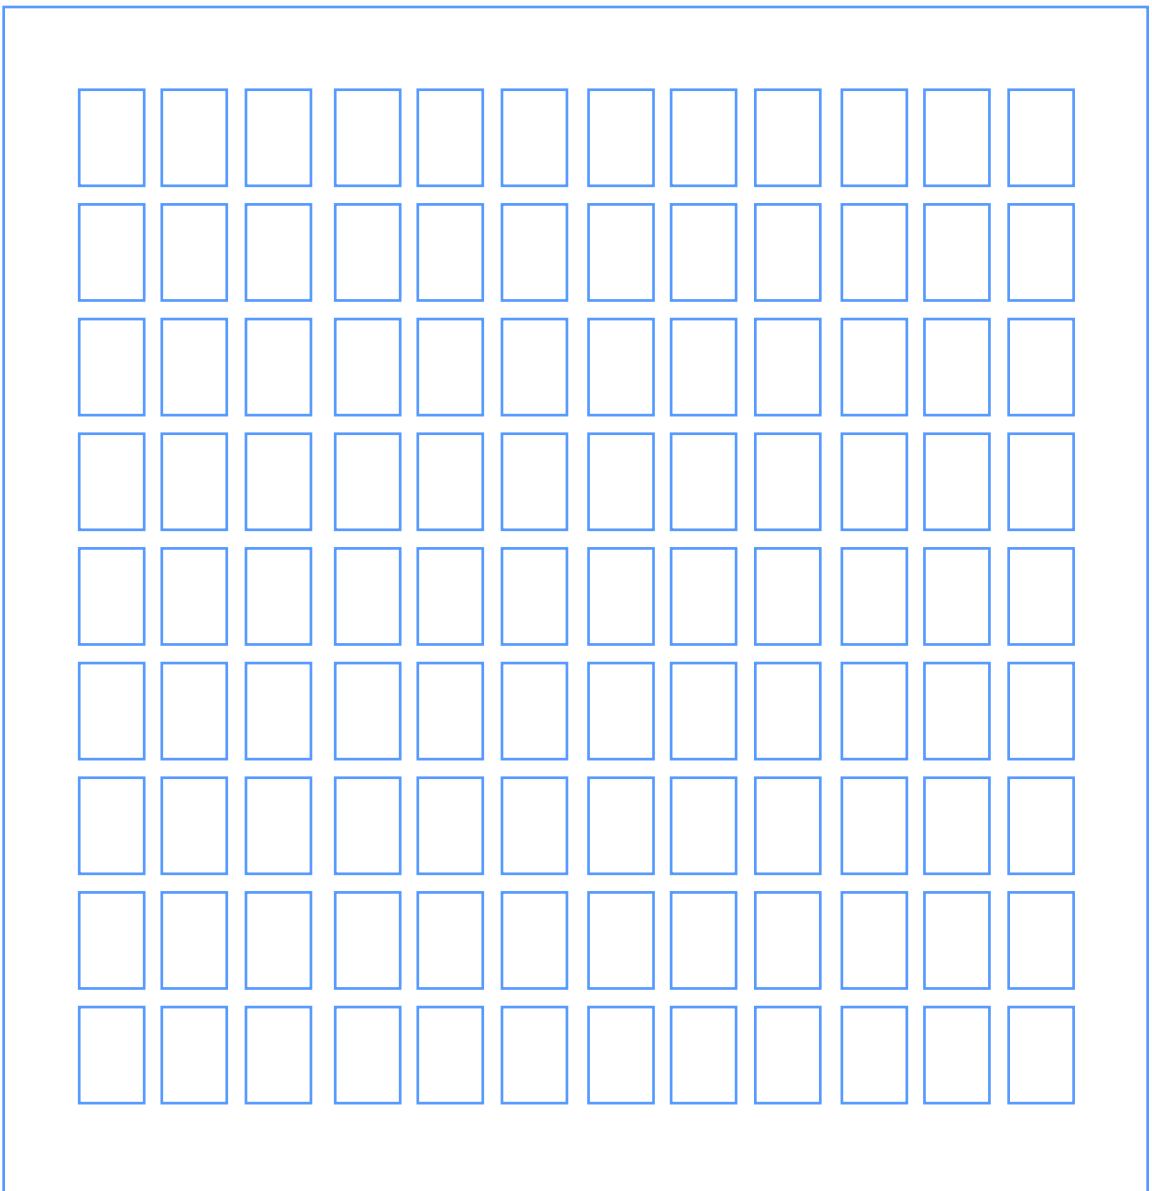

What is a component?

Image block, text block, Blog Post, Calendar .. Are all components (some with functionality) to be build atomically.

There are two sub libraries within the Components Library. The difference between the two is simple. One sub library will only have functions that have content management enabled. The other will be static, content management disabled.

LIBRARY OF PAGE TEMPLATES

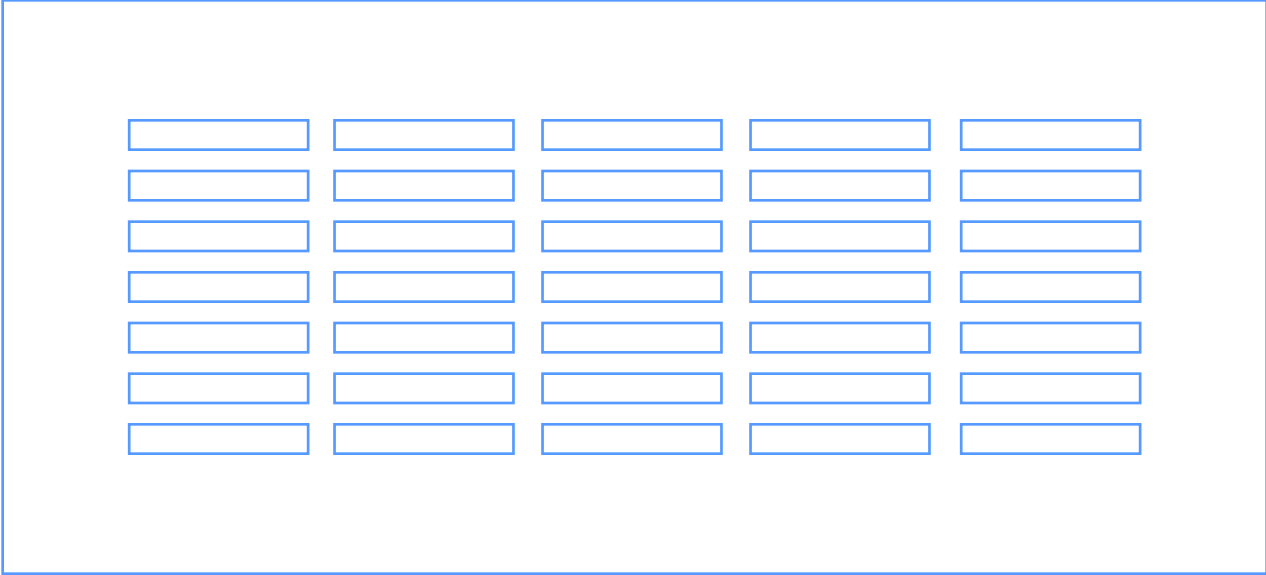

What is a page template?

A page template is a pre-made layout of a page with components and functions that serve a purpose.

For Example: A page template for an **Officer Profile page** will have a text blocks for Name, Rank and Division as well as an image block for the officers photo.

LIBRARY OF FORM TEMPLATES

What is a form template?

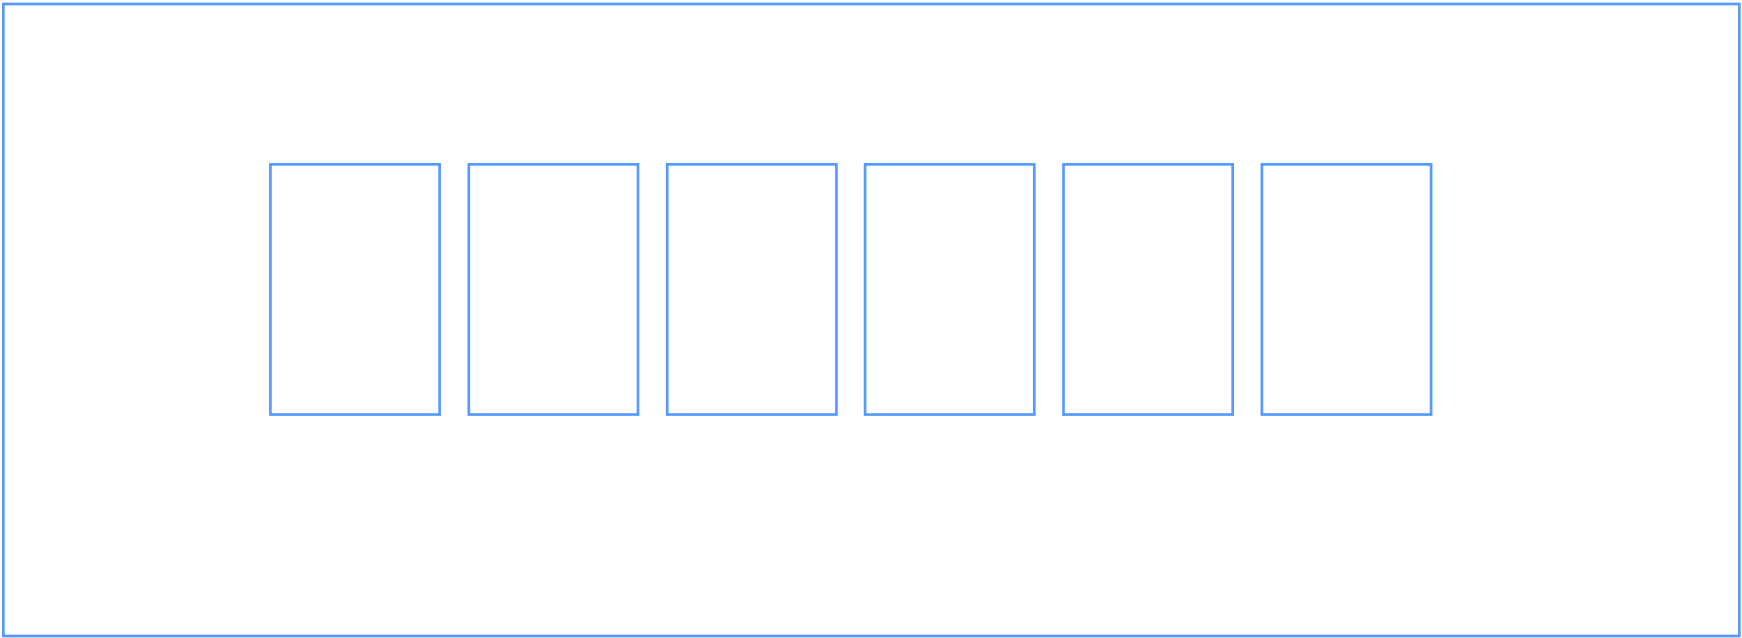

A form template is a pre-made form with a set of fields that serves a general purpose. Customization per client will likely be required.

For Example: A form template for an **File A Report** will have specific fields to gather the necessary information.

INSIDE THE CONTROL ENGINE

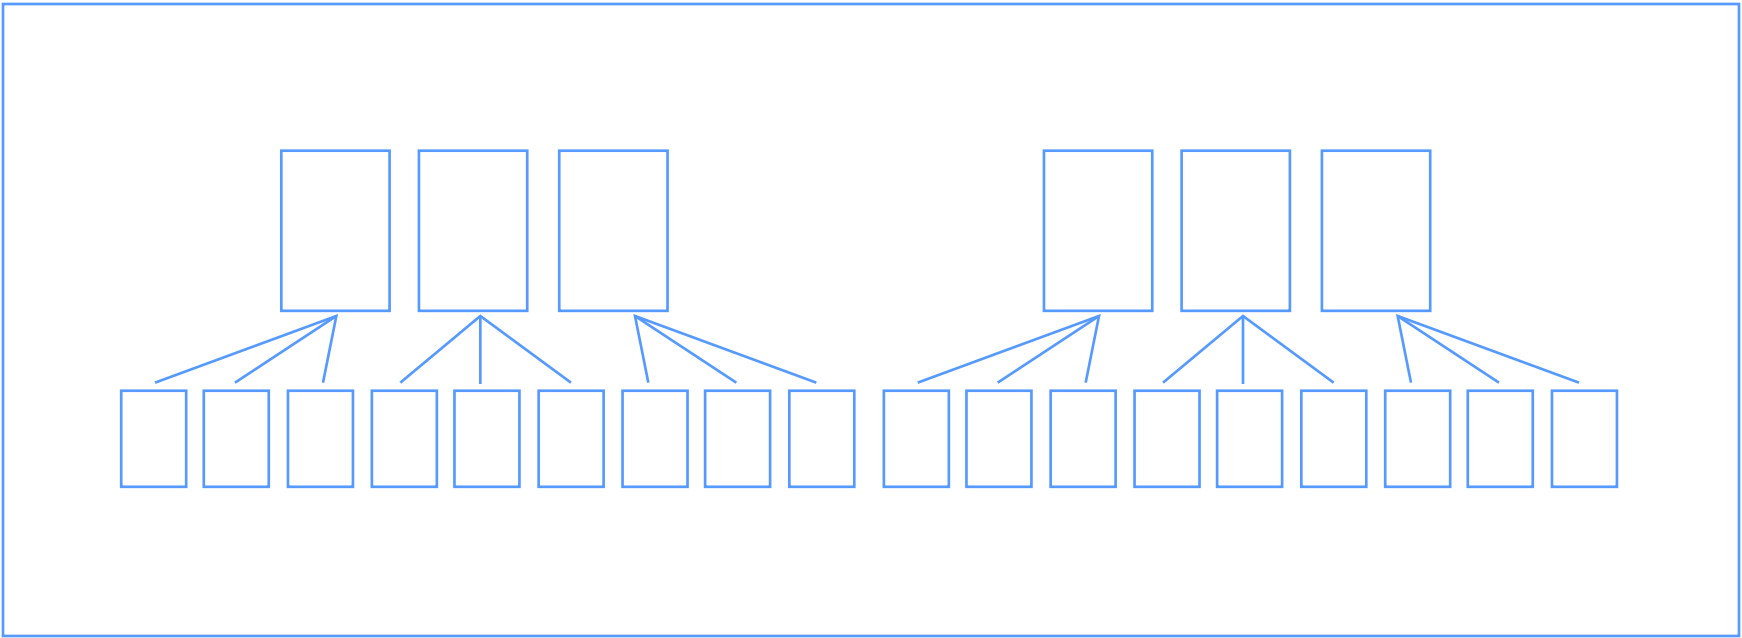

The Control Engine is where the website is assembled from a library of pre-made templates. The first spiral of development will include the deign and creation of a limited amount of templates for each library. As new projects are approached, new templates will be built and added to their respective libraries. Each template will be built granular and should be easily organized, customized and located.

LIBRARY OF HOME PAGES

This is a library of pre-made Home Page templates the template dictates the Layout of the homepage and not CSS.

LIBRARY CSS TEMPLATES

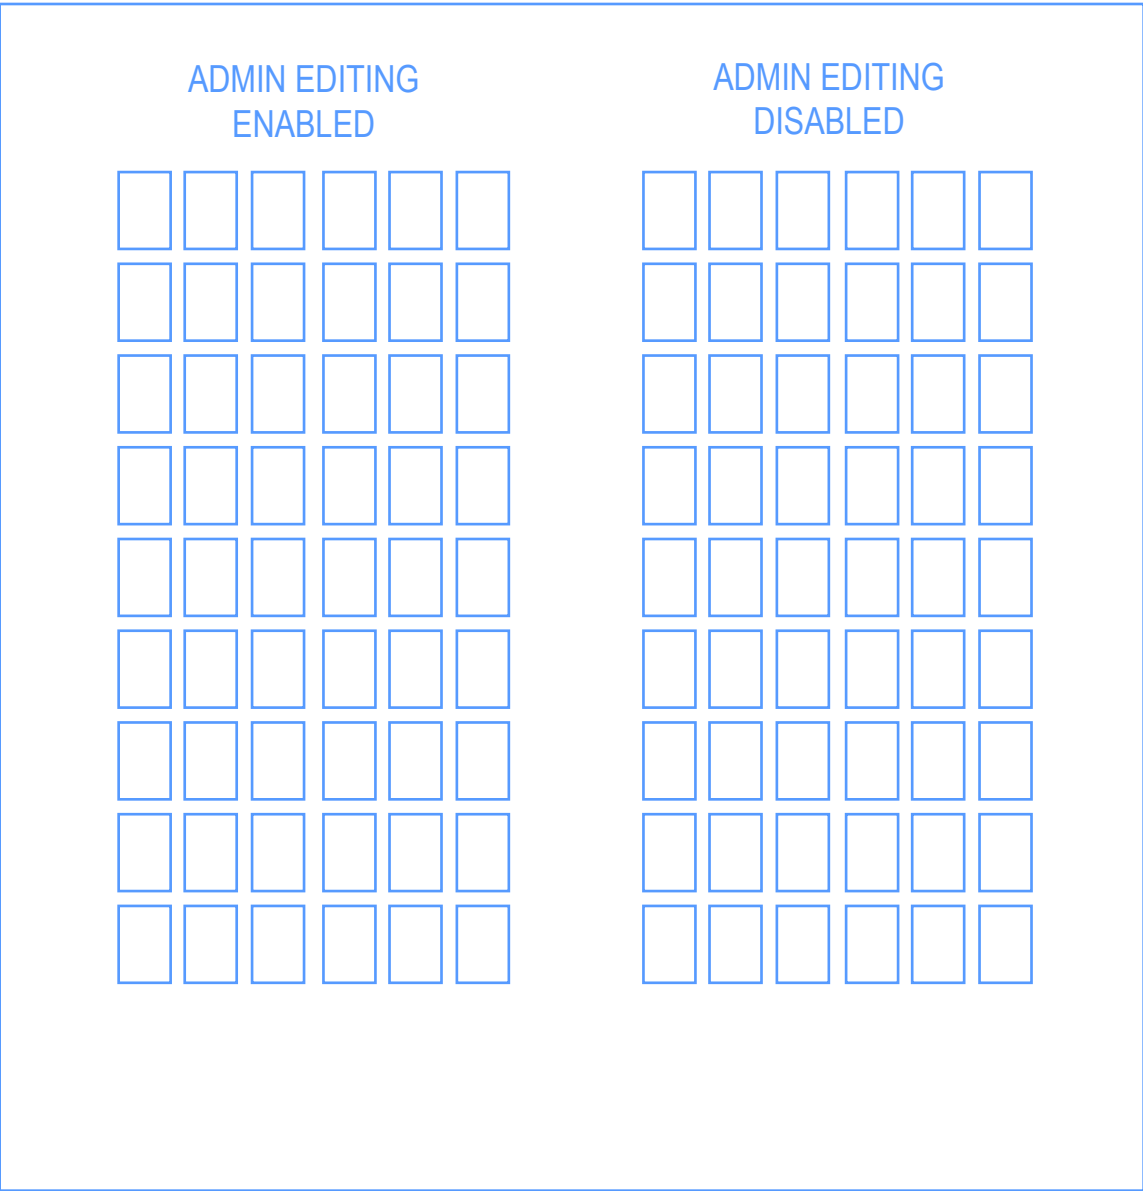

This is a library of pre-made Common Style Sheet templates, the CSS template chosen will apply to the Home Page and all Sub Pages.

FIRST STEPS

1st Spiral Components

Build all components and functionality atomically

- Media Container
- Text Container
- Buttons
- Links
- Blog Post
- Blog Display (List of posts)
- Event Calendar
- Event Page
- Social Media Share
- Social Media (Link to page)
- Search
- Forms
- Icons
- Containers
- Menu
- Map
