

The **Software/Solution** will be **installed** at Relativity's Server and access will be granted to the Agency

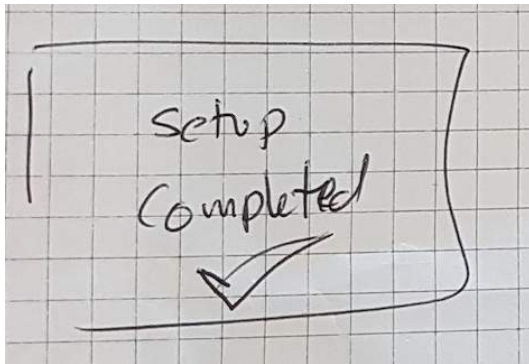

Relativity will have the **Agency request** with a template selected by them and details.

They will have **client's modules selection** to configure the website.

Once logged in, **Relativity**, will **configure** the website accordingly to the request.

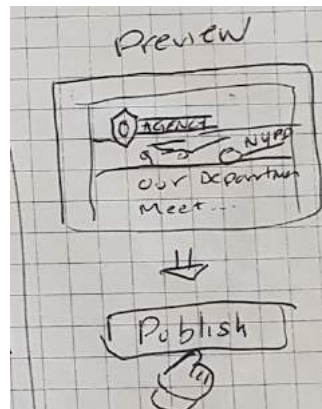

Once completed, the **Agency** will **get a notification** that they can access now in order to personalize the content.

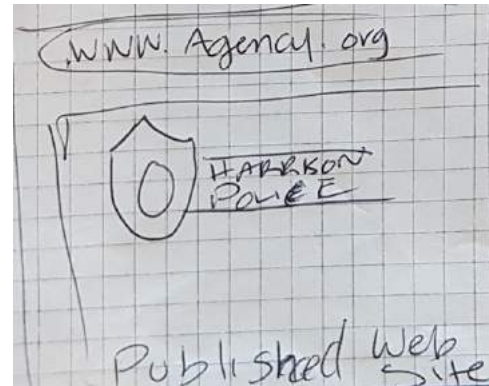

The **Agency** will be able to **log-in**

They will see their **site template ready to be edited** and update the content.

They will be able to **preview their updates** before publishing.

Once they **publish their changes**, they will be able to view the site in **production**.
